| <p>Sachdienliche Hinweise zur Lagerung und Verbrennung von Schuster-Briketts:</p> <ul style="list-style-type: none"> • Holzbriketts bei Transport und Lagerung vor Feuchtigkeit schützen • Befüllen des Ofens nur der Anlage entsprechend. Den Ofen nie überfüttern. Den Brennraum des Ofens höchstens zur Hälfte befüllen • Den Ofen niemals verschließen bevor das gesamte Brenngut durchgeglüht ist • Betreiben Sie kein Feuer in verschlossenen Räumen, sorgen Sie für ausreichend Luftwechsel • Verdichtete Späne dehnen sich beim Verbrennen aus • Die PE-Folienverpackung darf nicht mitverheizt werden • Die Verbrennung darf nur in dafür geeigneten und dafür zugelassenen Feuerstätten (siehe Bedienungsanleitung) erfolgen • Entzünden Sie das Feuer nicht mit leicht brennbaren Flüssigkeiten | <p>Istruzioni per stoccaggio e combustione di bricchetti Schuster:</p> <ul style="list-style-type: none"> • I tronchetti vanno tenuti e trasportati in luoghi freschi ed asciutti • Riempire stufe, caminetti o forni solo seconda la capacità dell’impianto. Riempire al massimo a metà dello spazio previsto per la combustione. Mai riempire completamente gli impianti • Mai chiudere l’impianto di combustione prima che tutto il prodotto risulta interamente bruciato • Non accendere fiamme in luoghi chiusi. Controllare che il cambio d’aria sia sufficiente • I trucioli compressi si dilatano con il calore • La confezione di polyethylene non deve essere bruciata • La combustione deve avvenire solo in impianti idonei ed autorizzati alla combustione (vedi istruzioni per l’uso) • Non accendere il fuoco con liquidi facilmente infiammabili |
| <p>Relevant instructions for stocking and combustion of briquets Schuster:</p> <ul style="list-style-type: none"> • Store and transport in dry fireplace • Filling of stoves and fireplaces only according to its filling capacity. Never overfeed the fireplace. The combustion chamber should be filled up no more than half way • Never close the oven before the whole kiln run is soaked thoroughly through • Do not operate a fire in closed areas. Make sure that the ventilation in the room is guaranteed • Pressed chips expand when subject to combustion • Do not burn the packaging of polyethylene • Only burn in appropriate facilities (see instruction manual) • Do not use highly flammable liquids to fire the facility | <p>Indications pour le stockage et la combustion des bûches compressées Schuster:</p> <ul style="list-style-type: none"> • protéger les bûches compressées contre l’humidité lors du transport et du stockage • effectuer le remplissage de votre poêle en fonction de votre installation. Ne jamais surcharger votre poêle. Remplir au maximum jusqu’à la moitié du volume de votre chambre de combustion. • Ne jamais fermer l’apport d’air frais de votre poêle avant que l’ensemble du combustible ne soit en feu. • Ne brûlez pas votre combustible en poêle dans des pièces fermées, assurez-vous d’avoir un échange et un apport d’air suffisant. • Les copeaux compressés de la bûche se dilatent lors de la combustion. • Il est interdit de brûler l’emballage en PE dans votre poêle. • La combustion ne peut que se faire dans un moyen de chauffage adapté et certifié pour l’utilisation des bûches compressées (voir notice du fabricant) • N’utilisez pas d’allume-feu à base de liquide facilement inflammable. |
